Directions:

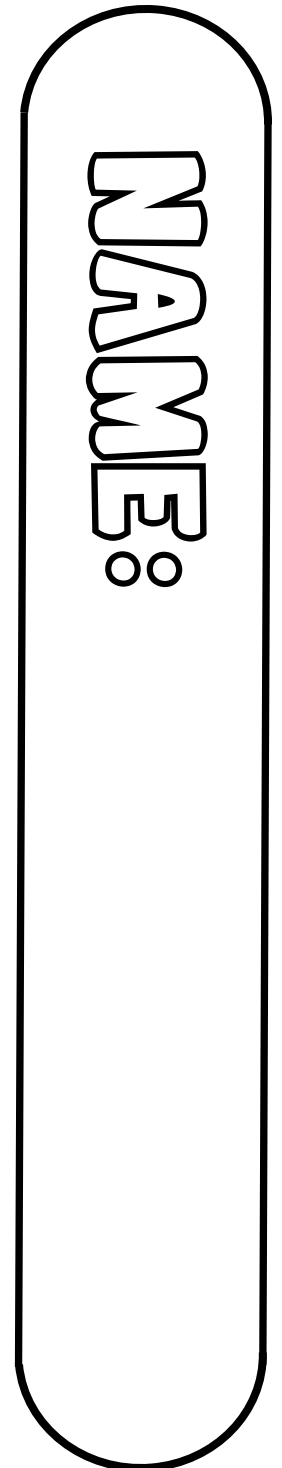

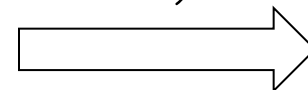

Check out the video tutorial for additional help!
<https://youtu.be/jkTlrCRQWeA>

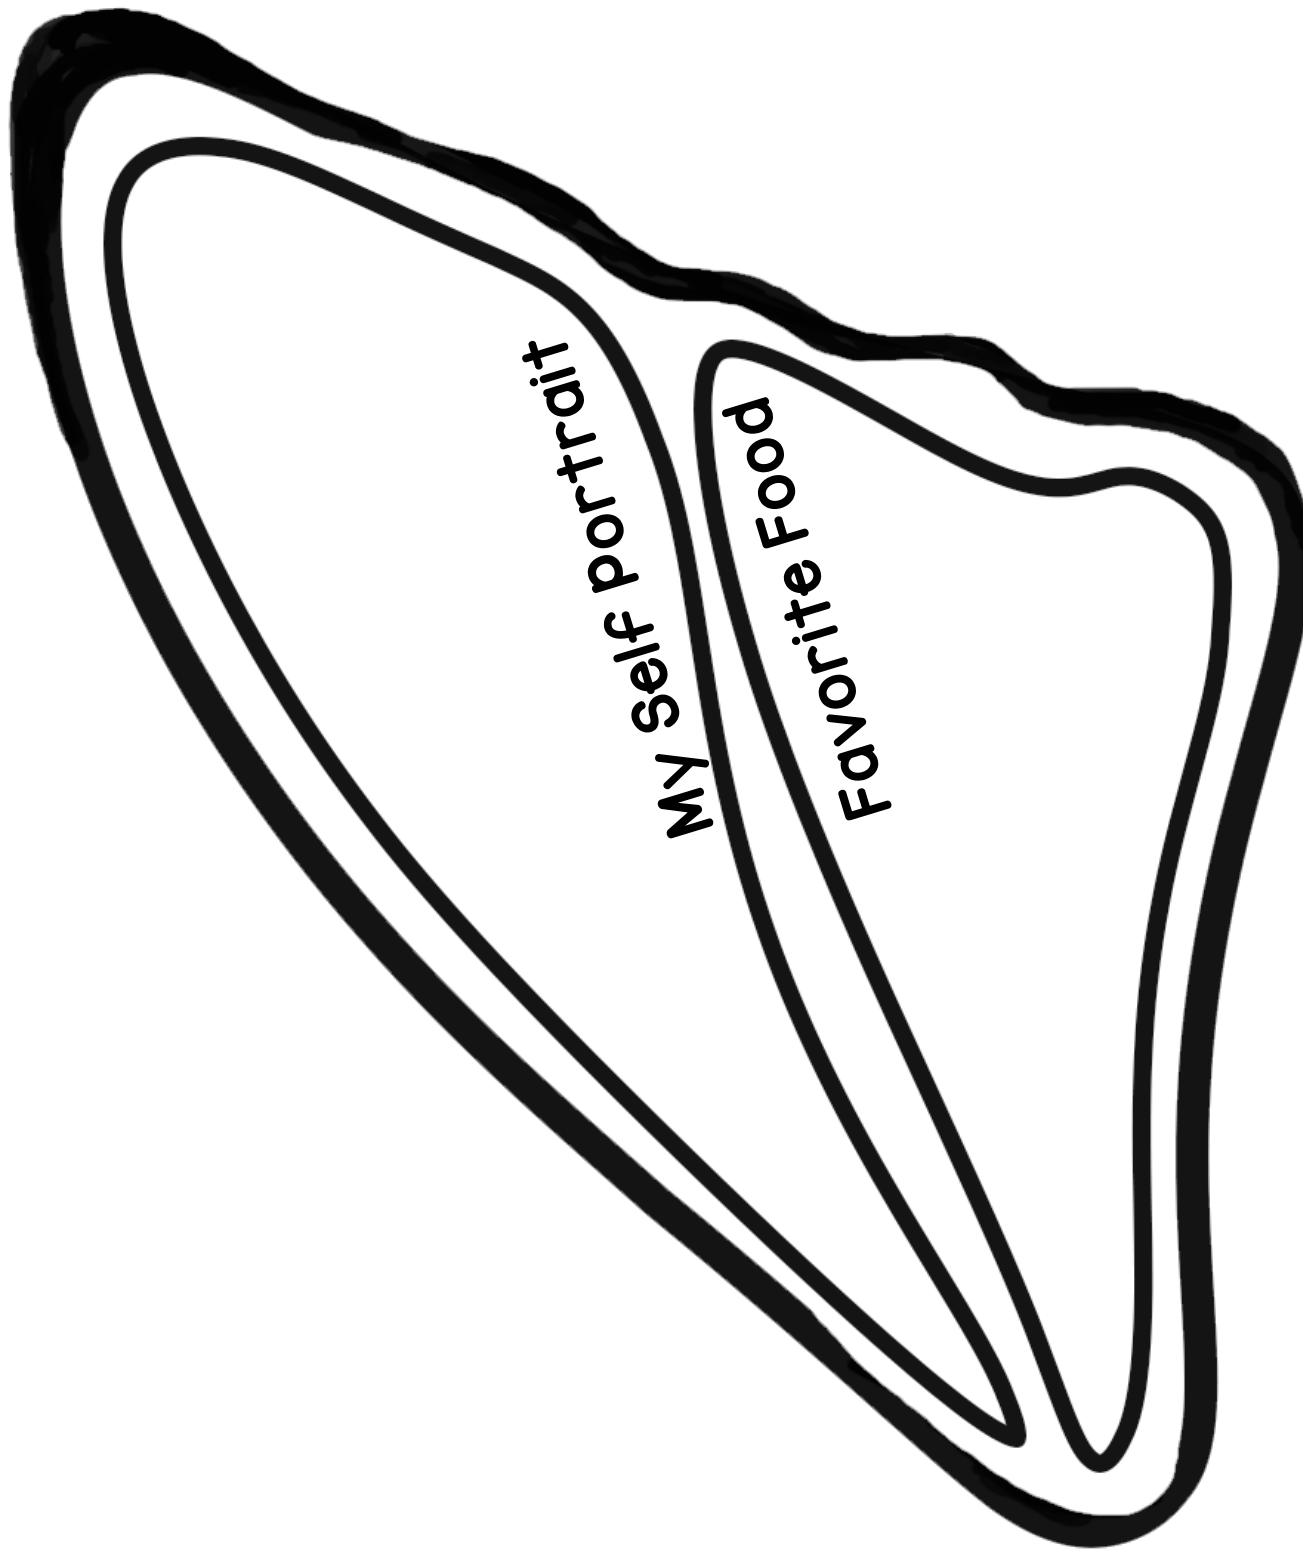

1. Decide if you would like to have a double-sided, or single sided butterfly.
2. Print pages needed.
 - For a double-sided butterfly, print page 4, then pages 5-12 back-to-back.
 - For single-sided butterflies, print: page 4, one left top wing, one left bottom wing, one right top wing and one right bottom wing
3. Color all pages. Color the body you would like to use (single, or double-sided).
4. Cut out all shapes. If creating the double-sided body, cut around entire image and fold the lines. Then cut only the dotted lines in the center. (Please see video tutorial).
5. Glue the top and bottom wings together and slide them through the cut in the body shape. Fold the name shape over the body and glue together. For single-sided butterflies, just glue the body shape on top of the wings.
6. Glue the antennae to the top of the butterfly and attach fishing line if the butterfly will hang.
